

HCI-EBS is financial services firm that focuses on serving medical professionals. They specialize in accounting, tax and payroll services, retirement plan administration, management consulting, and financial planning. The internship this summer was a very valuable experience for me and I have learned a lot about the business world throughout my seven weeks at HCI-EBS. This summer my work usually consisted of:

- Attending meetings with financial planners, accountants, management consultants, and tax professionals
- Performing basic accounting such as bank reconciliations, spreadsheet work, and clerical duties
- Courier services for clients
- Purging files for outdated documents
- Cross testing for clients retirements plans to ensure enough money is being placed in the retirement plans
- Compiling lists of clients that bring in the most business for the company

My day usually consisted of reporting to my supervisor in the morning and receiving my tasks for the day. I spent the most time doing accounting, working with retirement plans, and attending meetings. This internship was a great learning experience for me. Just working and being involved in the business world helped me get a better feel for what I want to do with my career and gave me an understanding of how the business world works. The financial planning and advising was the aspect of business that interested me the most during this internship at HCI-EBS. I know that in the future I would like to work in the financial area of the business world.
